

Strainer

SF, SFD, SFM

Operation

Inside the strainer a screen basket is fitted to retain solids. Additionally the type SFM is equipped with magnets to withhold ferromagnetic particles.

Application

Retaining of particles contained in liquids or gases.

Features

Characteristics of this sturdy type are:

- high temperature resistance
- high pressure resistance
- Magnet separator (SFM only)
- Easy maintenance
- Threaded connection
Special threads on request

Installation hints

The installation of the strainer can be done in any way in the system. The flow direction must be observed.

The strainer must not be used as a supporting part in a pipe-construction.

Technical Data

SF, SFD, SFM
